The 34th Precision Sheet Metal Technology Fair

Greetings

We would like to thank all participants and partners of the Technology Fair for further development of the sheet metal industry. The Precision Sheet Metal Technology Fair counts 34th this year. This fair has been held every year since 1989 in hopes of improving and exchanging technologies amongst the industry, by spotlighting the fabricating technologies that are concealed from the consumers' eyes, the crown of fabricating technology and know-how.

This Fair now attracts many entries from around the world.

The Precision Sheet Metal Technology Fair is a "Ceremony of Technology", and we are eagerly awaiting your entry.

Katsuhide Ito Chairman
AMADA SCHOOL OF VOCATIONAL TRAINING CORPORATION

Award Examples from the 33rd Fair

The award of Minister of Health, Labour & Welfare is to be given to the components with high technical skill.

Minister of Health,
Labour & Welfare Award

Guidelines for application

Eligibility Requirements:

■ Company

As a general rule, the entry product is to be made by a company engaged in precision sheet metal / sheetmetal working business, and uses sheet metal working / machines, in Japan and the other foreign countries.

■ Students

Students who are studying about metal processing at high school, technical college, university or vocational school are applicable to "student fabrication".

*Products created by teachers, professors or trainers will be classified as reference.

When & Where:

1. The entries are accepted from

May through October 2021.

2. The entries should be handed to an AMADA employee or sent to the local AMADA office.

How to Enter:

You can input directly to entry form.

<https://www.amada.co.jp/fair/eng/info/index.html>

Please fill in the entry form printed, and send it along with the product. And you can download an entry form from website. Please visit the website to find more detail. The following questions have high score points at selection process: **"the process you would like to appeal"** and **"illustrated explanation of fabricating know-how"**. Please fill them out in detail, with accuracy.

Terms for Application

1. The product must symbolize today's sheet metal fabricating technology, and must have been processed by sheet metal working machines.

2. The applicants are responsible for verifying with your client if you can display the product.

3. If you wish to exhibit the product under the copyrighted material of a third party (character, etc.), patent rights, design rights, trademark rights or other intellectual property rights, you must attach the certification of receiving proper license, consent from the right holder with the product.

4. Please do not mark the part with a company logo.

5. Exhibition category:

The 34th Precision Sheet Metal Technology Fair applies following 5 category.

Refer to the samples below.

1) Sheet metal parts (Single sheet fabrication)

2) Sheet metal assemble parts (Assembly of parts)

3) Welding fabrication (Welding technology & skills)

4) Formative arts fabrication (Idea and impression of formative arts)

Category Example

1) Sheet metal parts
(Single sheet fabrication)

2) Sheet metal assemble parts
(Assembly of parts)

3) Welding fabrication
(Welding technology & skills)

4) Formative arts fabrication
(Idea and impression of formative arts)

*The Judging Committee may change the above categories.

5) Students' fabrication (Fabricated by students)

*Products made by students who are studying about metal processing at high school, technical college, university or vocational school

6. Work piece size should be within **1,500mm in the total outside dimensions (length+width+height) and must not exceed 600mm in each dimension.**

Please contact the Precision Sheet Metal Technology Fair office if your work exceeds this size limit. Points may be deducted if your part is very large.

7. Basically, the entered product will **not be returned**. If you wish the part to be returned, please contact us.

8. The entries will be on display at the AMADA Solution Center in Japan from November 2021 through October 2022.

*The entries might be displayed in a private show or public show if the applicant accepts it.

***Others: By entering any part in this competition, the applicants agree to be bound by all conditions of this Fair.**

Selection Process

1. All entries will be judged according to the criteria as below for each category:
 - 1) Does the entry provide hints or ideas for fabricating technologies/ fabricating know-how?
 - 2) Does the entry use advanced or new technology based on today's sheet metal fabricating technology?
 - 3) High quality and high precision work-pieces utilized by advanced and experienced skills and methods.
2. The entries will be judged in two phases:
 - 1) Initial Selection
All entries will be exhibited at the AMADA Solution Center from November 2021 through January 2022, to be voted by the following members:
 - Visitors to the AMADA Solution Center
 - Members of the Japan Society for Technology of Plasticity
 - Board members of Japan's Local Sheet Metal Associations
 - 2) Second Selection
The nominated entries from the initial selection (one product per category for each company) will be evaluated by the Judging Committee which is composed of academic experts and sponsors. Each award winner will be determined based on the number of votes acquired.

Announcement of Winners

The winners of each award will be announced at a ceremony in March 2022.
